Temperamental Faucet[1]

A single glance will tell you how hot or cold your tap water is with the Chameleon[2] faucet．The prototype faucet，which was designed by Shane Koo，features a color－changing thermo film[3] at its tip．The head turns red when the water is hot，blue when it's cool．

可显示自来水冷暖的龙头

只要安上一个"变色龙"牌水龙头，你就能一眼看出自来水的温度。沙恩·库设计的这种水龙头的特点是在其顶端装有会变色的热敏薄膜，该部位在水热时变成红色，水凉时则呈现蓝色。

NOTE 注释：

faucet ['fɔːsit] n. 水龙头，旋塞
chameleon [kəˈmiːljən] n. 变色龙
thermo film 热敏薄膜
